Nine shooters showed up for a windy match at Heavens Ranch. we were treated to a cross wind of 2-6 mph on the hillside leg and a tail wind of the same intensity on the flat leg. The sun was out in force.

since starting at Heavens Ranch we have only had shooters hit 40/44 on one match, the first one. Since then no one has. 40+ was a regular occurrence at prado. The course has gotten slightly more difficult and the wind has been more prevalent than at our first match there. This is a perfect course for perfecting wind doping.

the HR cup is close to the tipping point. A "no show" for a match could change the leader board if a shooter has already used their throw away match.
